

Green Smart-Help Save Energy all Year Long

Look for GreenSmart Technology in Gas Fireplaces and Inserts.

Fireplace Xtrordinair is helping consumers save on energy usage and lower their heating bill, one fireplace at a time. New energy-efficient gas fireplaces and inserts-powered by a revolutionary system called GreenSmart—feature the most innovative collection of components, controls and technology that when combined provides an elegant, smarter and greener way to heat the h home.

The real power of GreenSmart is the entire collection of components, controls and technology features like: accent lights, flame adjustments, blower control and a choice of pilot ignition modes, a collection of features only available on GreenSmart models. An optional GreenSmart remote slows you to run the fireplace in “Smart Thermostat Mode” that automatically adjusts the flame height based on the temperature setting—so the flame will modulate up/down as opposed to shutting off/of like normal thermostat, thus conserving fuel and maximizing heating ability while extending the viewing pleasure of the fire.

Once you witness the value, aesthetics and energy savings of GreenSmart gas fireplaces, inserts and stoves-they’ll realize GreenSmart models are the ideal choice.
