

MODEL 31 AND 33 DVI GAS FIREPLACE INSERTS

The DVI series is all about flexibility: a big, beautiful, brightly glowing fire and a simplified operating system, while offering the same construction and glass viewing area as the top selling Lopi Model DVS GreenSmart and Model DVL GreenSmart gas inserts. Both DVI inserts feature the split-flow Dancing-Fyre™ burner with your choice of hand-crafted logs and glowing embers or stone kit with tumbled glass floor. The IPI (electronic ignition) gas valve provides a great fire presentation and a “green” money saving solution to home heating. For convenient hands free operation you can also add an optional wall thermostat or remote control thermostat.

FEATURES

- Dancing-Fyre Burner with the option of realistic logs with glowing red embers and wood-like fire or the stone kit with three colors of tumbled glass floor - reflective platinum, reflective bronze or cobalt blue, for a completely different fire presentation.
- Easy Heat/Flame Adjustment with a large high-to-low flame turndown ratio.
- Comfort Control™ that allows you to turn off the rear burner for less heat when desired or for year-round enjoyment of the fire.
- Built-in battery backup allows continued operation of your gas insert during power outages. Automatically switches back to AC when the power comes back on.
- Both DVI inserts are heater rated and can be used as the primary heat source in your home.
- LED lights automatically light up the control panel when you lower the control door. Powered by a 9 volt battery, this feature operates even during power outages.
- Choice of pilot ignition modes - money saving IPI Electronic Ignition mode for instant fire when you need it or Standing Pilot for colder climates where a heated chimney is needed to maintain the draft for proper operation.
- Approved for installation into both zero clearance (metal) and masonry fireplaces.
- Optional 180 CFM Convection Blower will increase the efficiency and rate of heat transfer from the insert into your home. The blower cannot be added after insert is installed.
- LP Conversion kit included with insert at no additional cost.

CONTROL PANEL

Note: For convenience, the Main Burner switch can be located on top right side of the finish panel.
