

LIBERTY STOVE

COOKTOP SURFACE

17

Shown with Steel Sculptured Legs, Pewter Door, Ashlip and Door Handle.

The Liberty™ is the largest stove made by Lopi. At only 2.6 grams of emissions per hour, it is also one of the cleanest burning large stoves ever approved by the EPA. The Liberty has the biggest firebox of any large stove, which accepts 24 inch logs. It also features a single control to adjust air flow, making it easy to achieve burn times up to 12 hours long. The Liberty's step-top design is enchanting yet functional, providing cooking and warming surfaces as well as radiant and convective heat. The viewing area is extra-large, allowing you to fully appreciate the splendor of the fire inside. The Liberty uses a 6" diameter flue, compared with the more expensive 8" flue required by other large wood stoves. The Liberty is also approved for Hearth Stove, Alcove and Mobile Home installations.

Options: Door, Ashlip Trim and Door Handle in Black, Brass or Pewter Finish, Four Decorative Leg Designs, Pedestal, Convection Fan, Elk Etched Glass, Outdoor Air Kit, GreenStart™ Igniter and Firescreen.

Emissions	Heating Capacity	Heat Output	Maximum Burn Time	Firebox Size	Maximum Log Size	Weight	Construction	Efficiency
2.6 Grams Per Hour	1,500 to 2,500 Sq. Ft.	Cord Wood 74,300 BTUs/Hr.	12 Hours	3.1 Cubic Foot	24"	490 lbs. (With Legs)	5/16" to 3/16" Steel Plate	Up To 76.9%
